

Securing Energy for Europe

Today and for the Future

Securing Energy for Europe. That's what we're committed to in the future. But there's an even bigger challenge: the green transformation.

CEO | *Dr. Egbert Laege*

About SEFE

Our mission

As a reliable partner for our customers all over Europe we source and supply gas and other sources of energy today and for the future. This promise is encapsulated in our name: Securing Energy for Europe. Our strategic vision goes beyond this. We ensure the security of gas supply and are driving the green energy transformation. We pursue this powerful vision with unwavering commitment. In everything we do, we are guided by a clear roadmap and utilise our collective expertise. This allows us to keep our promise to our stakeholders. We span oceans and continents to supply our customers with a more sustainable energy for future. We are a reliable partner, delivering on our vision and fulfilling our responsibility for future generations.

What we do

SEFE Securing Energy for Europe GmbH (SEFE) is an integrated energy company owned by the Federal Republic of Germany. It is active in various stages along the value chain. Headquartered in Berlin, Germany, the company has its strongest presence in Germany, supplying industrial customers and municipal utilities. SEFE is a midstream company focusing on trading and portfolio management, sales, storage and pipeline infrastructure. SEFE plays a pivotal role in providing energy supply stability for Germany and Europe.

Why SEFE

We are an innovative energy company with 30 years of market experience and deep expert knowledge. Finding the best solutions for our customers and partners is at the core of what we do every day. Strong relationships and trust are our top priorities to give our customers and partners the security, stability and confidence they need.

We offer our partners the opportunity to work consistently and efficiently with a single supplier and an international team at the same time. Our professionalism and deep expertise caters for all pan-European energy requirements.

Powered by the brightest minds, we develop and offer solutions that match the needs of our clients and partners. Our proven commercial capabilities enable us to successfully develop and operate within complex global energy supply chains. This allows us to reliably offer energy solutions at competitive prices.

Origination & Trading

SEFE has an established worldwide footprint with the ability to access markets globally, not only to source and trade energy but also to optimise the company's portfolio. We are a leading player in the European traded energy markets, combining physical and financial trading of gas, power and environmental products with the provision of risk management and market access services. As one of Europe's largest traders of natural gas, we have active EFET contracts with around 500 counterparties and trade a wide range of standard and complex products across all major European hubs.

Transport

Be it hydrogen, green gases or LNG in Europe, the gas market is changing, and transport routes need to adapt accordingly. As such, SEFE has a stake in several joint ventures operating in the field of LNG transport & shipping, whilst continually looking for ways to enable transportation of green gases or hydrogen to allow for greener future. Additionally, SEFE has a dedicated centre of expertise for LNG shipping.

Storage

Sales

SEFE supplies more than 50,000 customers in numerous markets, from small businesses to municipal utilities, regional gas suppliers, industrial companies, power plants and multinational organisations. With 30 years of experience in the European energy market, we are a leading supplier of gas, electricity, and green electricity products in Europe. Besides the German market SEFE is active also in Belgium, Austria, the Netherlands, the United Kingdom, France and the Czech Republic.

Storage

Energy storages guarantee security of supply, function as cornerstones of an affordable energy system and provide a storage solution for renewable energy in the future. They contribute to a large extent to the success of the energy transformation in Germany and Europe. As one of Europe's largest storage operators, SEFE's storage subsidiary markets a storage volume of nearly 6 billion cubic meters and holds approximately 25 percent of the total storage capacities in Germany.
